

D1 Labels

DYMO®

DYMO® D1 labels offer the performance and variety you need for any labelling job – indoor or outdoor, in your office, workshop, store or home, or anywhere else a label is required.

D1 labels use thermal printing technology (no ink or toner required) and are packaged in convenient cassettes which load automatically when inserted into your DYMO LabelManager™ label maker.

Available in 5 different widths and 10 distinct colour combinations (see reference table below), each label cassette contains 7 metres of continuous label tape so you can create sharp, easy-to-read labels of just about any length.
